FULL STACK WEB DEVELOPER

Full stack web developer applying a background in business administration from San Francisco State University to create a more intuitive overall user experience on the web. Educated at UC Berkeley Extension with newly developed skills in HTML, CSS, Javascript, JQuery, responsive web design and strength in meeting deadlines, teamwork and creativity. Passionate about collaborating with others to create meaningful web applications and breaking down problems piece-by-piece to find a solution. I've applied aspects of front end development and UX/UI while working in a group of three we used agile development to build an application that returns commute times relative to home location and preference. I'm excited to leverage my skills as part of a fast-paced, agile team dedicated to delivering quality work when creating web applications.

TECHNICAL SKILLS

Languages/Libraries: Java, HTML5, CSS, Json, Node.js, ES6, Express, React

Other Skills: Basic UX/UI design, Bootstrap, Server side APIs, Heroku

APPLICATIONS BUILT

Property Mover

Collaborative team project incorporating four APIs

Github repository: <https://github.com/ayladillis/Coding-Bootcamp-Project-1-Zillow-Maps-API-AD>

Project : <https://ayladillis.github.io/Coding-Bootcamp-Project-1-Zillow-Maps-API-AD/>

Travel Bucket List

The Travel Bucketlist app uses MySQL, Node, Express, Handlebars and a homemade ORM to run Node and MySQL query and route data in the app, and Handlebars to generate the HTML.
